

## Vue Js Lab One

Try all lecture points

- ✓ 1- Create an array of books , each book object contains ISBN , Name , Category , Image , number of pages , author , price
- ✓ 2- Display books names as list (ul) and make title for each li as book author
- ✓ 3- Using boot strap framework , display every book as card as following

If number of pages <50 assign css class less else assign css class more for card

When user click add to list button , add a new object book .
